28 SEP 1972

MEMORANDUM FOR: Assistant Deputy Director for Intelligence

SUBJECT : [] Request to Publish Article

1. This article represents an unclassified summary of a research project which [] has been conducting. I believe there is considerable value in involving our analysts in the academic community and this project is in pursuit of that policy. Moreover, his analytical approach is one that could and should be applied in the academic community in research from which this office would derive considerable benefit. It is hoped that publication may stimulate other efforts in this direction.

2. I perceive no security problems in publishing this article. While the analyst himself will be exposed, this is to my mind a good thing.

3. I have read the paper myself and can attest that it does not contain material that would not be available to any scholar working in the Soviet field. I recommend approval of [] request for publication.
